Elaine,

A copy of our General Permit for Produced Water is available on our website . I have attached a couple of certifications that show how it has been applied for both a larger scale treatment facility and a small single oil well facility.

Additionally, here are copies of permits for Iles Dome (larger scale oil operation) and XTO (CBM permit in the raton basin).

Subject: Example of CO issued NPDES permit for oil and gas

Good Afternoon Janet, Andrew -

I just wanted to follow up with my conversation with you on my interest in getting a sense on how each of our states are addressing NPDES permitting for conventional oil and gas facilities and their discharge of produced water. I would be interested in an example permit and SOB for both an older facility that is discharging to meet water quality criteria, as well as a newer facility that may also include WET limits or

WET to establish Reasonable Potential. This will be helpful as we work through our oil and gas permitting in Indian Country as well as in helping us get a sense of how NPDES for oil and gas is being addressed regionally.

Thanks
Elaine
